DESCRIPTION

The LTS-540A LTD-5000 LTC-5000 series are 0.52 inch (13.2mm) height 7-segment displays

The red series devices utilize LED chips which are made from GaAsP on a GaAs substrate. The bright red and green series devices utilize LED chips which are made from GaP on a transparent GaP substrate. The yellow, orange and high efficiency red series devices are made from LED chips which are made from GaAsP on a transparent GaP substrate. Red, bright red, yellow and orange displays have gray face and white segment color. Green displays have gray face and green segment color. High efficiency red displays have red face and red segment color.
