## 4 A CAPACITY, THE VARIETY OF CONTACT ARRANGEMENTS

mm inch

## FEATURES

- The variety of contact arrangements

2 Form A 2 Form B, 3 Form A 1 Form
B, 4 Form A

- Latching types available
- High sensitivity in small size 100 mW pick-up and $\mathbf{2 0 0} \mathbf{~ m W}$ nominal operating power
- High shock and vibration resistance Shock: 50 G Vibration: $\mathbf{1 0}$ to 55 Hz at double amplitude of $3 \mathbf{~ m m} .118$ inch
- Wide switching range From $100 \mu \mathrm{~A}$ 100 mV DC to 4 A 250 V AC
- Low thermal electromotive force Approx. $3 \mu \mathrm{~V}$
- Dual-In-Line packaging arrangement

## ACCESSORIES

## Specifications

| Breakdown voltage | 1,500 Vrms between terminals |
| :--- | :---: |
| Insulation resistance | More than $100 \mathrm{M} \Omega$ between terminals at 500 V DC Mega |
| Heat resistance | $150 \pm 3^{\circ} \mathrm{C}\left(302 \pm 5.4^{\circ} \mathrm{F}\right)$ for 1 hour. |
| Maximum continuous current | 4 A |
| (Note: Don't insert or remove relays while in the energized condition.) |  |

## Dimensions

Terminal width: 1.3 .05
Terminal thickness: 1.2 .047

PC board pattern (Copper-side view)

## Inserting and removing method

 Inserting method: Insert the relay as shown in Fig. 1 unit the rib of the relay snaps into the clip of the socket.Removing method:
(1) Remove the relay straight from the socket holding the shaded portion of the relay as shown in Fig. 2.
(2) When sockets are mounted in close proximity, use a slotted screw driver as shown in Fig. 3.

## NOTES

1. Special use of 2 coil latching types: 2 ways can be considered if 2 coil latching types are used as 1 coil latching types. (A) Reverse polarity is applied to the set coil of 2 coil latching type.
(B) By shorting terminals 12 and 7, apply plus to 1 , minus to 6 at set and plus to 6 , minus to 1 at reset. Applied coil voltage should be the same as the nominal. Operating power will be reduced to onehalf.

2. Soldering operations should be accomplished as quick as possible; within 10 seconds at $250^{\circ} \mathrm{C} 482^{\circ} \mathrm{F}$ solder temperature or 3 seconds at $350^{\circ} \mathrm{C}$ $662^{\circ} \mathrm{F}$. The header portion being sealed with epoxy resin, undue subjection to heat may cause loss of seal. Solder should not be permitted to remain on the header.

## CAUTIONS FOR USE

Based on regulations regarding insulation distance, there is a restriction on same-channel load connections between terminals No. 2, 3 and 4, 5, as well as between No. 8, 9 and 10, 11. See the figure below for an example.

For Cautions for Use, see Relay Technical Information (see catalog).
